

Green Hills – Maple and Kelly Canyons

Conservation Easement Monitoring Report and Photo Record 2025

Prepared by Mindy Wheeler and Kenzie Anderson-Bell

Property Name: Green Hills Maple Canyon and Green Hills Kelly Canyon		Acres: 545 Ac (Maple Canyon) 436.75 Ac (Kelly Canyon)
Acquired Date: 11/12/1998 (Maple) 8/20/1999 (Kelly)	Monitoring Date: October 17 and 21, 2025	
Location: East side of Ogden Valley in and around the Green Hills homeowner community.		

Original Owner	Current Owner	Property Manager
James Aland (Maple) 6993 S Bybee Dr Ogden, Utah 84003	Green Hills Country Estates HOA PO Box 372 Huntsville, UT	Green Hills Country Estates HOA PO Box 372 Huntsville, UT

Property Description: Maple Canyon CE – Weber County, Utah NE of Huntsville in T6N, R2E, sections 3,4,9, and 10.

Kelly Canyon CE Weber County Utah NE of Huntsville in T6N, R2E, in sections 4,5,8,9, and 10.

Additional Property Comments: A new fence was installed on the north and west side of the Maple Canyon CE boundary, likely in August of 2025.

Property Access: Maple Canyon- drive East from Huntsville on 100S/ SR39, turn north onto 9000 E, which continues north into the Green Hill Country Estates. After 0.8 mile, turn right onto Maple Dr and travel 0.5 mile where a section of the property is adjacent to the road.

Kelly Canyon – drive E from Huntsville on 100S/ SR39, turn N onto 9000 E, which continues north into the Green Hill Country Estates. After 0.7 mile, turn right onto Kelly Dr and travel 0.4 mile where the road will intersect with the Kelly Canyon CE access road.

1. Introduction

1.1 Purpose of Conservation Easement:

“The purpose of the easement is to assure that the Property will be retained predominantly in a condition that protects and enhances open space values which includes watershed protection to maintain good water quality, critical winter habitat for big game species such as deer, elk and moose, quality habitat for a variety of other wildlife and natural aesthetics and to prevent any use of the property that would significantly impair or interfere with the conservation values of the property. Grantors intend the easement will confine the use of the property to activities that are consistent with the purpose of the easement and that in no case will use of the property cause the property to deteriorate from its present condition, evidenced in the baseline documentation. ...” (Deed of Conservation Easement, Document No. 702228 (or 158992)).

There are amendments to both Conservation Easements signed in 2017 to help clear up deficiencies and ambiguities in the original Conservation Easements that needed resolution for effective management and protection of Conservation Values (Document #: 2865377 or 702278 (Kelly Canyon) and 2865378 or 702279 (Maple Canyon)).

1.2 Landowner Communication and Follow up

Kenzie Anderson-Bell and Mindy Wheeler were in communication with the email contact for Green Hills HOA, Jay, between October 13-15, prior to field inspection on Friday October 17. Topics discussed were permission to conduct the review, details of the inspection process, associated costs to the HOA if any, and confirming access points. A follow up email was sent by Kenzie Anderson-Bell and Mindy Wheeler on October 17 regarding returning to finish field work on Tues October 21, which Jay approved. Finally, email communication between Jay, Kenzie Anderson-Bell, and Mindy Wheeler took place Mon December 8, to inquire about the new fence construction. Jay informed us that he is unaware of the design or layout of the fence and that it is the property bordering the HOA that is installing the fence.

1.3 Ongoing Management / Unresolved Interests (if applicable)

- 2017 – Amendments were filed on both of the Conservation Agreements in June of 2017 because the Parties identified a number of deficiencies and ambiguities in the CE that needed resolution for effective management and protection of the Conservation Values
- 2024: CE monitors wanted clarity on access to the property.
- 2024 – invasive weeds such as Dyer’s woad, cheatgrass and teasel were mentioned as needing to be controlled.

2025 field visit observations: These are time-intensive easements due to their large size, high volume of photopoints to revisit from the baseline inventory, and complications with overlapping CE boundaries of Kelly and Maple Canyon resulting in shared photopoints (Kelly Canyon A, OO, PP, QQ, RR = Maple Canyon A, T, U, V, and W). In the past few years, drone footage has been used to monitor these properties, but it is difficult to achieve the level of detail needed for on-the-ground monitoring. Should on-the-ground monitoring continue, it may be helpful to create a new priority-based list of ~20 points to visit across both properties. ATV use may aid in reducing time to access points and going in the growing season (June-July) would make identification of weeds easier (Dyer’s woad, Yellow and Dalmatian toadflax, and Yellow Starthistle). Finally, revising the projections of the points and boundaries may be required to increase accuracy if one is to revisit original photopoints and assess the new boundary fence.

2. Compliance Monitoring

2.1 Monitoring Methods:

Field	Information
Date:	October 17 and 21, 2025
Surveyors:	Kenzie Anderson-Bell, Mindy Wheeler and Ben Gibbons
Methods:	Inspection conducted on foot. Surveyors revisited established photo points, replicated baseline photographs, and recorded observations relevant to wildlife preservation and compliance with easement terms.
Time spent on property:	A total of 28 person hours
Data collection and processing:	Photographs and location coordinates were collected using ArcGIS Field Maps, with notes recorded on the bearing or general direction of each photograph and any site-specific concerns such as invasive plant species or litter. Collected data was compiled and mapped in ArcGIS Pro. Universal Transverse Mercator (UTM) coordinates were calculated from decimal degrees, using Zone 12, NAD83.

3. Compliance Summary:

3.1 Rights and Permitted Uses:

Category	Compliance Summary	Comment
Purpose	Yes, with note	The purpose of the Property, as outlined in Section 1, is to maintain wildlife habitat and open space. These uses appear consistent with current conditions.
Administrative Access	Yes,	No public access is granted with this Conservation Easement.
Fence Construction & Maintenance	Yes	A new fence has been installed along the north west boundary of the Maple Canyon property (Figure 2 and Maple Canyon Photographs # 53,55, and 58-61).The CE document states: "Fencing or rock barriers will be constructed and maintained by the Grantors on the Property boundary, adjacent to private lots or roads in developed portions of Green Hills subdivision
Signs	Yes, with note	Access signage should be installed to clearly identify the property (Maple Canyon Photopoint LL, Photograph 89-90).

3.2 Prohibited Uses:

Category	Compliance	Comment
Wildlife Depredation	Yes	No evidence of hunting was observed.
Soil Erosion	Yes	No activities or uses observed that would adversely affect erosion control.
Easement and Rights-of-Way	Yes	No unauthorized easements or rights-of-way observed.
Dumping	Yes	No dumping observed; however, evidence of a constructed and recently used fire ring was noted, (Figure 2 and Kelly Canyon Photograph #109).
Livestock Grazing	Yes	No evidence of livestock grazing was observed.

3.3 Compliance Summary:

Regarding the Maple Canyon CE document: "Fencing or rock barriers will be constructed and maintained by the Grantors on the Property boundary, adjacent to private lots or roads in developed portions of Green Hills subdivision (i.e., outside of the easement Property), where compliance with the above Access Restrictions is reasonably at risk."

New fence has been constructed on the north and west side of the Maple Canyon easement (Figure 2 and Maple Canyon Photographs 53, 55, 58-61).

In support of the easement’s purpose to maintain and enhance wildlife habitat, it was noted that state-listed noxious weeds are present on the property. Regular monitoring and control of invasive plant species are recommended to prevent further spread and degradation of habitat values. Timely management is essential to maintain compliance and ecological value. State-listed noxious weeds observed include: *Isatis tinctoria* (Dyer’s Woad), *Cardaria draba* (White top), *Cirsium arvense* (Canada thistle), *Linaria dalmatica* (Dalmatian toadflax), *Phragmites australis* (Common reed), and *Centaurea solstitialis* (Yellow starthistle) (Figure 3 and Kelly Canyon Photographs 105-109). It should be noted that the Yellow starthistle was located just outside of the perimeter of the Kelly Canyon conservation easement, close to the neighborhood, but is a source for spread. Additional non-state-listed but concerning invasive species observed include: *Dipsacus fullonum* (Common teasel), *Arctium minus* (Common burdock), *Verbascum thapsus* (Common mullein), *Verbascum virgatum* (Wand mullein) and *Bryonia alba* (White bryony) (Figure 3 and Kelly Canyon Photographs 101 and 104-109).

The most concerning of these finds is the yellow starthistle – as that weed is known to expand its infestation rather quickly and aggressively at the expense of desirable vegetation (Figure 3 and Kelly Canyon Photograph 107).

It is recommended that the landowner contact the designated Utah Division of Wildlife Resources (UDWR) representative, Melissa Early (mearly@utah.gov), to work with the state’s ISM (Invasive Species Management) grant program in hopes of receiving both expert and financial assistance to develop a noxious weed plan as well as active treatment of noxious weeds.

Weeds found on property and their corresponding state designations

Common Name	Scientific Name	State designation	Notes
White top/ Hoary Cress	<i>Cardaria draba</i>	Class 3- Containment	Although this weed is class 3, it is well known for its difficulty in control – it would be advisable to go after the small populations of this weed before they become uncontrollable
Yellow starthistle	<i>Centaurea solstitialis</i>	Class 2- control	Since the property has so little of this weed, this should be a priority for control
Dalmatian toadflax	<i>Linaria dalmatica</i>	Class 2- control	Map true perimeter of infestations and control from outside in, bio-control available for this weed
White bryony	<i>Bryonia alba</i>	State researching for possible inclusion to state list	Has been called the ‘Kudzu of the West’ – keep an eye on infestations to keep at a minimum
Dyer’s Woad	<i>Isatis tinctoria</i>	Class 2- control	Control smallest, most isolated populations first
Canada thistle	<i>Cirsium arvense</i>	Class 3- Containment	Demands persistence in control

Common Reed	<i>Phragmites australis</i>	Class 3-Containment	Since so little on the property, should be a priority for control to maintain integrity of wet areas
Teasel	<i>Dipsacus fullonum</i>	State researching for possible inclusion to state list	https://www.invasivespeciesinfo.gov/terrestrial/plants/common-teasel
Hounds-tongue	<i>Cynoglossum officinale</i>	Class 3-Containment	
Cheatgrass	<i>Bromus tectorum</i>	N/A	Keep areas with native grasses and shrubs intact as possible
